

Genesis in colour

Genesis is all about taking something great... and making it even better. And our range of stunning colours and beautiful woodgrain foiled finishes do just that.

As there's nothing standard about our window, there's also nothing standard about our colours and finishes either. You'll notice that the colours in our palette have been carefully selected to replicate the colours that were traditionally used to paint sliding sash windows.

You can even choose different colours on the outside and inside to complement your interior décor.

Unlike paint, our foiled finishes are highly durable and won't peel, fade or crack over time, so your windows will look as stunning in years to come as they do the day they're installed.

Full range of woodgrain and heritage finishes available.

BISON LIFE

The re-birth of the sliding sash window

Genesis Vertical Sliding windows

Genesis VS

Genesis is a revolutionary PVC-U sliding sash window designed to recreate the timeless elegance of timber.

Modern technology meets traditional craftsmanship

Perfect for period properties or contemporary buildings, Genesis combines traditional styling with modern technology for the ultimate in performance.

When we think of classic sliding sash windows we often think of wood. But while new wooden windows can look stunning, after several months they'll need expensive, time-consuming maintenance to keep them looking as good. Add to that the initial high cost of timber and there's only one solution...

Less costly than timber, Genesis retains all the period charm of its timber ancestor but with all the benefits that a modern window has to offer. So, why would you choose wood when you can have Genesis?

Bison Life

The Genesis VS from Bison is a unique window that really does hit the spot when it comes to traditional appearance.

The unique joint design to both sash and outer frame replicates a traditionally-made timber window for a truly authentic appearance, setting your windows apart from the rest. Combined with period hardware and a complete range of heritage finishes, the Genesis VS pushes the boundaries of modern PVC-U sliding sash windows. Performance, style and elegance are all at the forefront with this period-feel window.

Traditional

Genesis recreates the beautiful styling of a traditional timber sliding sash window like no other. With its authentically jointed frame and sash it replicates the windows of yesteryear that are found in period cottages and older properties. In days-gone-by, the only option was timber. With the advent of Genesis, the modern vertical slider draws strongly on its traditional roots and puts all of its competitors in the shade. Modern PVC-U and glazing technologies offer the ultimate in comfort whilst still retaining period style.

Modern

With its elegant styling and precision design, the Genesis vertical sliding sash will enhance any modern home as well as a traditional property. Designed for modern living, Genesis combines cutting-edge technology with the traditional character of a box sash window. Precision-engineered for smooth, simple operation, Genesis effortlessly complements your modern lifestyle.

- Authentically jointed frame and sash, lending a traditional feel to modern window technology
- Up to WER 'A' rating yet still retaining time-honoured grandeur and appearance
- Complete range of authentic woodgrain and heritage coloured foil options
- Matching Georgian/Astragal bar to enhance the traditional styling
- Deep bottom sash rail as standard for true authenticity
- No glass bonding required with the unique milled sash design
- Can be made flat-pack, if required, for ease of transport

Whether you are retaining the elegance of an older property or injecting a period feel into a new-build, the Genesis VS seamlessly combines an authentic 'hand-crafted' appearance with all the comforts of a state of the art window giving you the best of both worlds.
